DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over

Fujiwara et al (2001/0013843 A1) In view of **Lane**⁹ (5,823,784).

3. As to claims 1-6, **Fujiwara et al** discloses an image display device including a master display (figs. 2 and 3 (11), page 3, col.2, [0052]); and a slave display unit (figs.2 and 3 (12-14), page 3, col2 [0053]) that display a plurality of pictures coinciding in position on a projection screen (20), the master display unit (11) generates an on screen picture (page 3, col.1, [0044]), the data corresponding to the master display unit are transmitted to the first, second and third slave display unit (fig.2,3 master(11), slave (12,13,14)). It would be obvious to one skill in the art to recognize that one can select one of the display units as a master or a slave in case of malfunction.

Fujiwara et al has failed to teach that the slave display unit equipped with an erase unit, which erases the portion of the image in a display region. However, the patent of Lane is cited to teach that it is well known of a slave display unit to have an erase unit to erase portion of the image (see, col.3, lines 21-33) and the erase portion is black (see, figs.2 and 8 (22)).

Therefore, it would have been obvious to one skill in the art at the time of the invention was made to have used erasing portion of the image as taught by Lane into

the slave display device of **Fujiwara et al**, since this will allow the user to have the ability to mask an wanted portion of the image not to be seen by others.
